

Ventspils Beer brewery – Pub

COURLANDER

Foto autors: Alus darītavas - kroga Courlander foto arhīvs

This bar is special by the fact that it is located at the same building where the brewery is located, and visitors have the possibility to take a look at the process of brewing beer.

The pub provides a possibility to buy and taste beer – COURLANDER lager Light and COURLANDER lager dark produced in the brewery, as well as different warm and cold snacks, including different fish dishes.

“COURLANDER” beer is brewed according to “German Beer Purity Law” adopted in 1516, which states that beer must be produced using only 4 ingredients: barley malt, hops, water and yeast. Beer is unfiltered, it contains no preservatives and it is not pasteurised.

SIA “Ventspils Alus Darītava” was founded in 2016 in order to revive old beer brewing traditions in the old town of Ventspils. Industrially produced beer has been manufactured in the old town since the 19th century. The company is located at the edge of a four-century ancient market square, in a building that had once been “Buļļu” pub, beloved by the townspeople.
