Cross- country ski track

The history of the adventure park began with the idea of creating a ski hill in the coastal lowland of the Baltic Sea – Western Latvia. In order to implement the idea, a unique hill was created on the outskirts of Ventspils, at Saules Street 141, which is based on construction debris and unusable street soil material that has been mined in Ventspils since 2003. year . –

Already in 2005, a well-equipped ski hill "Lemberga hüte" was waiting for visitors to enjoy winter fun. In the summer, a rope course was built in the forest, next to the mountain, which got the name "Cat's Trail".

Summer attractions are also being added, and since 2007, a service building with an equipment rental point and a cozy cafe has opened its doors to visitors.

2012. 2012. at the end of the year, the premises of the rental point and cafe were expanded in the service building, and an outdoor terrace was built. 2013. 2013. the offer of attractions was significantly supplemented – a new amusement area with a soft surface and attractions: bumper cars, bumper boats, springboard boat, children's driving school, in the center of the amusement area there are laminar fountains.
