

Event Rolling the Planets on Easter

We usually roll eggs at Easter, but why not roll planets? The planets are also round and colorful like Easter eggs.

We invite families to attend the educational lesson "Solar System", where we offer to watch the cartoon "Hrumka and the Magical Rocket" and do practical work in the lesson, where each family will have the opportunity to make their own model of the Solar System.

The materials needed for the lesson will be already prepared, all you need are curious minds and active hands.

Payment for the film according to the price list + 1.50 eur per lesson per person.
