

Event Earth Day organised by the Planetarium of the Ventspils Centre for Creative Learning

On April 22, in the Ventspils Jaunrades House Planetarium, we invite families to attend the lesson "Earth Day". At the beginning of the lesson, at 12:00, we will watch the popular science film "Our Dangerous Planet", but after the film, during the lesson, we will pay special attention to our planet Earth. So what exactly was our planet like now? In the lesson, you will have the opportunity not only to test your erudition, what we know about the Earth, but also to do practical work, we will create our own model of the planet Earth.

Payment for the film according to the price list + 1.50 eur per lesson per person.
