

Creative workshop Anatomy of the Ear and the Perception of Sound

Foto autors: Zinātnes centrs "VIZIUM"

In April, the theme of the creative workshops is dedicated to sound. Technically creative workshops "Skaņa" will take place every Saturday and Sunday in April at 13.00. New workshop content will be offered every weekend:

April 22 – 23. "Anatomy of the ear and sound perception".

The topic of the workshop is dedicated to one of the most important human sensory organs – the ear. In the workshop, you will have the opportunity to create an ear model to understand the 3 parts of the ear and their functionality! Also, with the help of experiments, it will be clarified how the ear perceives sound and how ear cleanliness and hearing problems can affect sound perception and quality. Visitors will also have the opportunity to learn about the impact of using headphones on human hearing health.
