Ventspils Seaside Park is a wide and well-equipped park near the sea in Ventspils offering recreational and walking opportunities for whole family.

Many different trails wind through the park, as well as 2 special trails – Anchor trail and Jungle trail.

Anchor trail is 730 m long and presents the largest collection of real ship anchors in Baltics with 152 different anchors, from which 35 are exponated in anchor trail. The greatest of them is 23 tons heavy and 6 meters tall.

The **jungle trail** is 380 m long and children will especially like it – you can climb and creep like in a real jungle, there are several footbridges, suspended bridges, a tower and a track that reaches a height of 2 m at the highest point and leads from tree to tree. Going on the trail does not require physical fitness, it can be done by both big and small visitors.

There is also a small train at the Seaside Open-air Museum running through the Park along the narrow-gauge railway line.
