

“Little Explorers’ Workshop: The Moving Snowman” for preschool-aged children at the VIZIUM Science Center.

Preschool-aged children have the opportunity to participate in the “Little Explorers’ Workshops,” where, through games, play, and engaging in fun activities with cheerful instructors, they can not only have a great time but also develop new skills and gain knowledge.

This weekend, children will create a moving snowman by combining engineering and art principles. This workshop will be both educational and creative, allowing them to learn how simple structures can be brought to life with rotating parts.

The registration form can be found [here](#).
